

I am writing to express my interest in the Product Engineer, Frontend Engineer, or UI/UX Engineer position within your organization.

With over six years of experience designing and building digital products across government, enterprise, and fintech environments, I bring a unique combination of frontend engineering expertise and product design thinking. My experience spans the complete product lifecycle—from user research and interface design to frontend architecture and deployment.

Throughout my career, I have worked on large-scale workflow-driven systems where usability, reliability, and scalability were critical. At **RSBoPP** and the **National Assembly**, I contributed to enterprise and government platforms that support structured operational processes and data-intensive workflows. These experiences strengthened my ability to translate complex business requirements into intuitive, accessible, and high-performance user experiences.

In addition, I have led the product design and user experience development of **BioTap**, a biometric payment platform focused on secure and frictionless financial transactions. This project allowed me to combine product strategy, UX research, design systems, and frontend engineering to create a solution centered on trust, accessibility, and usability.

My technical expertise includes React, TypeScript, Next.js, Material UI, WebSockets, REST APIs, and modern frontend architecture. Alongside my engineering skills, I have extensive experience with Figma, design systems, prototyping, and user-centered design methodologies, enabling me to bridge the gap between product vision and technical execution.

What excites me most about this opportunity is the chance to contribute to meaningful products that solve real-world problems while collaborating with talented teams focused on innovation and excellence.

I welcome the opportunity to discuss how my experience, technical capabilities, and product-focused mindset can contribute to your organization's goals.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Azewene Njigwum
